## Product description

Polymer flexible engine mounts

## Application/Limitation

The mounts are approved for use for mounting of propulsion, auxiliary engines and reduction gear.

Size of mounts to be chosen according to the maker's data sheets for the approved series of mounts.

## Type Approval documentation

### Tests carried out

Tests carried out in January 2007, reported in IsoFlex Booklet received with letter from DNV Brisbane dated 2010-03-19.

### Marking of product

The product to be marked with manufacturer's name or trademark and type number identification.

### Periodical assessment

For retention of the type approval, a DNV GL surveyor shall perform an assessment after 2 years and after 3.5 years, to verify that the conditions of the type approval are complied with. A renewal assessment will be performed at renewal of the certificate.

In cases where the type approved product is manufactured at other companies, the periodical assessment shall verify that the type approval applicant has a quality control system for consistent production at their licensees/subcontractors. Furthermore, periodical assessment shall be carried out randomly at these companies.

### Other conditions

No product certificate required.

Installation, maintenance and inspection of the mounts to be done according to the maker's instructions.

Engine vibration calculations to be submitted for approval according to DNV GL Rules for Ships Pt.4, Ch.2. Sec.1 [6 Foundations for Machinery].
